### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The claims are drawn to an array which consists of a plurality of nucleic acid probes, where each probe consists of one of the sequences of SEQ ID NOS 1-124,031, and wherein the plurality consists of each of probes of SEQ ID NOS 1-124,031. The claims are also directed to an array as set forth above, where each probe is attached to a bead (claim 4). The claims are also drawn to an array which consists of a plurality of nucleic acid probes where each probe consists of one of the sequences of SEQ ID NOS 1-124,031, or the complement, and where the plurality consists of each of the sequences of SEQ ID NOS 1-124,031 and the complement of each of SEQ ID NOS 1-124,031 (claim 2). The claims are also drawn to an array which consists of a plurality of nucleic acid probes where each probe consists of one of the sequences of SEQ ID NOS 1-124,031, or the sequence of such with a mismatch in the middle, and where the plurality consists of each of the sequences of SEQ ID NOS 1-124,031 and each of the sequences of SEQ ID NOS 1-124,031 with a mismatch at the central position.

The claims are allowable over the cited prior art because none of the cited references provide motivation to arrive at an array consisting of the 124,031 probes wherein each probe consists of each of one of the specifically recited SEQ ID NOS: 1-124,031, optionally attached to a bead, or arrays which also consist of the complement of each of SEQ ID NOS 1-124,031 or the sequences of each of SEQ ID NOS 1-124,031 with a mismatch at the central position. Applicant's arguments regarding the 102 rejection over the reference of Affymetrix 10K array are persuasive and the rejection has been withdrawn as the reference is not prior art.
